

HEF-18ESM Eyelet Fastening Machine

A low cost solution to increase productivity

The HEF-18ESM eyelet machine is the perfect addition to increase productivity in your business. This machine is suitable for inserting eyelets in various printing, apparel and engineering applications. The die set can be adjusted to suit the material thickness, ensuring that you have the same setting each time. Die sets are custom made and can be configured to suit your specific requirement.

Machine Features:

- Automatic feed for eyelets.
- Interchangeable raceways and tooling available.
- Multiple die set configuration available
- Low maintenance cost.
- Increased productivity and accuracy.
