

HP-36 Heavy Duty Hand Press

Increase productivity and accuracy

The HP100 heavy duty hand press is designed to insert self-piercing canvas eyelets from size SP0 to SP9. The machine stands approximately 700mm high and has a throat depth of 70mm. The die sets are quick to change over and are very economically priced. Custom tooling can also be manufactured for special requirements.

Machine Features:

- Economical solution for fastener setting.
- Die sets are readily available and economically priced.
- Die sets available to suit 15mm diameter snap fasteners.
- Machine is supplied with one set of canvas eyelet dies.
- Die height can be set for consistent setting on various material thickness.
