

Model 4KEW

The **Model 4KEW** offered by Eyelets Supply Company is the most advanced eyelet machine available. This machine utilises pneumatic force and an innovative toggle linkage to generate more force with less energy; plenty of power to cut through multiple layers of the toughest fabrics. The 4KEW has fewer moving parts than the mechanical eyelet machines to simplify maintenance issues. And, to offer maximum flexibility, it is available on a Pedestal or Mobile stand, or can be bench mounted. The controls allow the operator to shuttle a washer or retract the cylinder with a push of a button; providing safer and faster operations.

Benefits of the 4KEW

- Fewer moving parts
- Reduced footprint
- Improved guarding configuration with interlock security
- Ability to convert between eyelet sizes

- Integrated electronic PLC controls
- No timing requirements as all machine sequences are programmed
- Jams can be cleared by flipping a switch
- Ability to add sensors to confirm eyelets and washers in tracks

Specifications

- Dimensions (mm):
- Bench Space: 787 W x 559 D x 914 H
 - On Stand: 787 W x 559 D x 1702 H
- Weight / Crated:
- Bench: 141 / 182 kg
 - On Stand: 172 / 263 kg
- Electrical: 230 VAC 60 HZ, 1 Ph
Air: 80-100psi; 7-10cfm

(Shown on Standard Pedestal Base with Barrier Guarding Removed)

Features

- Pneumatically powered with toggle linkage creating a higher level of force
- Innovative cutting technology to punch a hole in materials and compensate for a nominal variance in material thickness
- Designed to promote faster, safer and more cost effective operations.
- Available for a wide range of Eyelet sizes and accomodates Neck, Tooth and Spur Washers.
